EDUCATION

Guru Gobind Singh Indraprastha University, Delhi Aug 2023 – June 2027
B.Tech in Computer Science

- **Cumulative GPA:** 8.9
- **Relevant Coursework:** Operating System, Computer Network, Database Management System, Data Structure and Algorithm, Software Engineering, Object Oriented Programming

EXPERIENCE

Gen AI Intern, Ministry of Electronics and Information Technology (MeitY) – New Delhi July 2025 - Sept 2025

- Analyzed real-world Generative AI systems and proposed scalable implementation strategies for production environments
- Collaborated with cross-functional teams to evaluate feasibility and architecture of AI-based solutions
- Presented technical findings and system-level recommendations to senior stakeholders of Software Industry Division

Scholar and Trainee, SheFi Feb 2025 – May 2025

- Built foundational understanding of distributed systems, blockchain architecture, and decentralized applications
- Explored real-world implementations of DeFi protocols and smart contract workflows

PROJECTS

Clario - AI-Powered Mental Health Companion *(Flutter, AI/LLM, Firebase, Google Cloud)* Demo APK

- Developed Clario, an AI-powered mental wellness and sleep companion using Flutter, Firebase, Gemini AI, and Google Cloud, enabling personalized journaling, emotional reflection, sleep analysis, and multilingual voice-based interactions.
- Engineered an innovative AI-driven Empty Chair Therapy module and Clario AI Twin, leveraging conversational AI for guided self-reflection, emotional clarity, relationship insights, and personalized wellness recommendations.
- Built and integrated scalable cloud-based services including Firestore, Cloud Functions, Cloud Scheduler, and MCP-powered AI agents to deliver real-time sleep coaching, automated journal insights, mood-based avatar generation, and 7-day AI sleep reports.

OnTrack - Task Scheduler Web App *(React.js, Tailwind CSS, Java Script, Vite)* Live

- Developed a responsive task management app with calendar view, CRUD operations, search/filter/sort, and data visualization using React and Recharts
- Implemented client-side data persistence, a multi-theme system (dark/light modes), and a modular component architecture using React hooks

Autism Support Platform *(React, Python, APIs)* Live

- Built a full-stack AI-powered autism support platform featuring ISAA-based screening, conversational assistance, and therapy recommendation generation for parents
- Integrated LLM pipelines using LangChain for contextual parent guidance and therapy recommendations
- Designed modular backend architecture for handling user inputs, scoring logic, and AI inference
- Implemented responsive UI with real-time chat interface and voice-enabled interaction

SKILLS

Technical Skills: C++, Java, Python, JavaScript

Cloud, AI and Tools: Google Cloud Platform, Generative AI, Azure, Visual Studio, Git, GitHub

Database: MySQL (Relational Database)

Soft Skills: Problem Solving, Public Speaking, Team Work, Leadership, Time Management, Self Motivated

ACHIEVEMENTS AND EXTRACURRICULAR

- **National Finalist**, Google Gen AI Hackathon, Top 10 out of 1,85,000+ teams (Team Lead) Nov 2025
- **AWS AI and ML Scholar** July 2025 - Sept 2025
- **Google Cloud Gen AI Academy** April 2025 - Aug 2025
- **Shortlisted** for Flipkart Grid 7.0 (top 10 percent) July 2025
- **Creative Head**, E-Cell ADGIPS (Organised E-Summit, Pitching events, tech contest) Oct 2024-Present
